

# 3D Mini Mallet

## Code Walkthrough

Code Color Guide  
Keyword      Number      Boolean

### First Cylinder

Make a cylinder and center it:

```
cylinder(h = 10,r = 3, center = true);
```

### Rotate

Rotate the cylinder 90 degrees:

```
rotate([0,90,0]){  
  cylinder(h = 10,r = 3, center = true);  
};
```

### Handle Cylinder

Add another cylinder as the handle cylinder:

```
(h = 15,r = 2);
```

### Resolution

For finer resolution lower the number; the lower the number the higher resolution:

```
$fs = 0.4;
```
